README
Meeting Room Booking System
A modern single-page web application for booking meeting rooms in an office environment, featuring comprehensive validation, real-time availability, and an intuitive user interface.
Tech Stack
Frontend: React 19 + Vite + Tailwind CSS
Backend: Spring Boot 4 (Java 25)
Database: SQLite with JPA/Hibernate
API: REST with comprehensive error handling

##
# You should look at the following URL's in order to grasp a solid understanding
# of Nginx configuration files in order to fully unleash the power of Nginx.
# https://www.nginx.com/resources/wiki/start/
# https://www.nginx.com/resources/wiki/start/topics/tutorials/config_pitfalls/
# https://wiki.debian.org/Nginx/DirectoryStructure
#
# In most cases, administrators will remove this file from sites-enabled/ and
# leave it as reference inside of sites-available where it will continue to be
# updated by the nginx packaging team.
#
# This file will automatically load configuration files provided by other
# applications, such as Drupal or Wordpress. These applications will be made
# available underneath a path with that package name, such as /drupal8.
#
# Please see /usr/share/doc/nginx-doc/examples/ for more detailed examples.
